

ADCA Camera Drone

A VALUE-DRIVEN ALTERNATIVE TO THE ADCA CAMERA

The ADCA Camera Drone gives you an economic option that looks just like an ADCA series camera. A dummy lens creates an even more realistic appearance.

This non-functional camera drone augments our ADCA330 and ADCA470 series, to provide an additional level of deterrence without the cost of a fully operational camera.

The camera drone has two mounting points suitable for a standard photographic 1/4 inch x 20 UNC mounting bolt (not included).

SPECIFICATIONS

Model Number

ADCADRONED Camera Drone, ADCA, Fixed

Operational

Lens Dummy

Mechanical

Weight 0.45 kg (0.99 lbs)
